

Innovation and Incubation Centre

Shri Guru Ram Rai University

Dehradun, Uttarakhand

14th March 2026

One day Seminar on “IPR- Prototype to Commercialization of a Medtech”.

SGRRU
SHRI GURU RAM RAI UNIVERSITY

Honorable Shri Mahant Devendra Dass Ji Maharaj
President, SGRR University

SEMINAR ON

**IPR: Prototype to
Commercialization of a MedTech**

Organized by:

**School of Basic & Applied Sciences
collaboration with
'Innovation and Incubation Center'
Shri Guru Ram University,
Patel Nagar, Dehradun**

Sponsored by:

UCOST, Government of Uttarakhand.

Dr. DEEPAK JOSHI

**Centre for Biomedical Engineering,
IIT Delhi**

Date : 14th March 2026

Venus : SBAS Auditorium, SGRRU, Patel Nagar D.Dun

About the Talk

On **14 March 2026**, **Prof Deepak Joshi** delivered a lecture on “**IPR: Prototype to Commercialization of a Medtech.**” The talk focused on the journey of transforming innovative biomedical ideas into commercially viable medical technologies while protecting intellectual property rights (IPR).

Dr. Joshi explained the **innovation pathway in medical technology**, starting from problem identification in healthcare to prototype development, validation, and eventual commercialization. He emphasized the importance of **intellectual property protection**, particularly patents, to safeguard innovations and enable technology transfer to industry. Drawing from his experience at **Indian Institute of Technology Delhi** and collaborations with **All India Institute of Medical Sciences**, he illustrated how interdisciplinary research between engineers, clinicians, and industry partners accelerates the development of impactful medical devices.

During the lecture, Dr. Joshi highlighted the role of innovation ecosystems such as the **School of International Biodesign** program under the **Ministry of Biotechnology**, which supports the translation of healthcare ideas into practical solutions. He also discussed key steps in commercialization, including **clinical validation, regulatory approval, technology transfer, and startup creation**. By sharing examples from his own research and successful technology transfers, he demonstrated how academic research can lead to real-world healthcare products.

Overall, the lecture provided valuable insights into **bridging the gap between laboratory research and market-ready medical technologies**, encouraging researchers and students to focus on innovation, patent protection, and collaboration to bring healthcare solutions to society.
