- **Primary Objective of the Activity:** The objective of the activity was to create awareness among patients about the importance of patient safety, educate them on basic practices such as hand hygiene, medication safety, and infection control, encourage active participation and communication with healthcare providers, reduce the risk of hospital-acquired infections and medical errors, and improve overall quality of care and patient satisfaction.
- **Aligned SDG Goal(s):** (SDG 3): **Good Health and Well-being** – Promoting awareness about patient safety, infection prevention, and responsible healthcare practices to improve health outcomes and ensure quality care for all patients.

### **Detailed Description of the Activity:**

#### **A. Activity Introduction**

The activity began with a brief introduction highlighting the importance of patient safety and quality healthcare practices.

- Patients were informed about common risks in healthcare settings such as hospital-acquired infections, medication errors, and lack of awareness.
- The session emphasized the role of patients in ensuring their own safety through awareness, communication, and adherence to prescribed guidelines.

#### **Expected Outcomes**

- Increased awareness and understanding among patients regarding patient safety, infection control, and medication practices.
- Enhanced patient participation and improved communication with healthcare providers.
- Reduction in risks of hospital-acquired infections and medical errors, leading to better quality of care and patient satisfaction.
