3: Highest Correlated, 2: Medium Correlated, 1: Lowest Correlated

Course Outline:

Unit I-Activities Related to Reading of Text:

- 1- Teacher Educator will give a topic (related to empirical, conceptual and historic work, policy document) for reading. After reading, pupil teachers will discuss their view in group on the given topic of reading.
- 2- Teacher educator will examine/observe the handling with the diverse texts of the students and remedial suggestions will be given.

Unit II-Activities Related to Skills and Strategies:

- 1- Teacher educator will demonstrate essential skills (model reading, drill, pronunciation, silent reading etc.) of reading and writing.
- 2- Narrative texts, expository texts from diverse sources, autobiographical narratives and field studies etc. could also include addressing various reading skills and strategies.
- 3- Teacher educator will set goal for learning, monitoring, comprehension and self-reflection.

Unit III-Activities Related to Assignment:

Students will read, summarize and describe empirical, conceptual and historical work, policy documents and studies about school etc. and submit reading- reflection in the form of written assignment.

Unit IV-Activities Related to Observation and Discussion:

- 1- Pupil teachers will observe the activities of peer group.
- 2- Teacher educators will motivate pupil teachers to think and critically analyze activities of self and group during reading, discussion and writing.

Unit V-Activities Related to Evaluation and Reflection:

- 1- Students will develop reflections from experience and observation.
- 2- Teacher educator will evaluate reflections. Following class room activities will be helpful for students within three steps –
- 3- Write before you read
- 4- Write-while-you-read
- 5- Write-after-you-read

Activity I: Relating an Experience:

Students will write about something they have experienced (historical, policy perspectives, teaching and learning etc.)

Activity II: Predicting:

Students will preview the text put text aside and write down what they think about the text. Teacher educator will help students to compare and discuss predictions in the classroom.

Activity III: Split-Page Notes:

Students will read the texts; highlight their selections of text; divide a piece of paper into two columns and write the main ideas they found in the text on the left side of the paper and the details on the right side. Compare, revise and clarify the selected text within small groups.

Activity IV: Plus-Minus-Interesting:

Students will draw a table with three columns and to label the columns plus, minus and Interesting. After reading text, students will write it into one of the three columns. What they see as being positive, write in the Plus column; write negative points in the Minus column; and interesting points in the last column marked Interesting. Activity will be followed by group discussion

Activity V: Retelling:

Students will review the text; select key words; recall; retell and reconstruct through oral and written presentation

2. To develop an understanding of the importance and need of communication through ICT.
3. To develop an understanding of the psychological bases of using various support media required for ICT.
4. To provide much hands-on experience with computers.
5. To familiarize student-teachers with contemporary teaching- learning techniques.
6. To enable student-teachers to recognize, understand and appreciate ICT as an effective learning tool for learners and an enormous functional support to teachers.

Course Outcomes (COs):

Upon successful completion of the course a student will be able to

CO1	Identify concept of ICT in Education.
CO2	Relate to develop an understanding of the importance and need of communication through ICT.
CO3	Apply ICT to help students to become competent and confident
CO4	Classify skills to assist them

CO5	Design psychological bases of using various support media required for ICT.

- Writing objectives in behavioral terms in content areas of science.

Unit III: Curriculum Organization:

- Organizational structure of curriculum,
- Types of curriculum, principles of Science curriculum,

- curriculum objectives,
- Trends in Science curriculum.
- Justification for including Science as a subject of study in school curriculum.

Unit IV: Lesson Planning:

- Meaning and need of lesson planning,
- characteristics of good lesson plan,
- Types of lesson plan,
- approaches in lesson planning;
- Herbart and RCEM.
- Design of lesson plan in the content area of science
- simulation and microteaching skills.

Unit V: Teaching Models and Strategies:

- Meaning and definition of teaching models,
- fundamental elements of teaching models,
- types of teaching models;
- behavior modification and constructivist.
- Microteaching simulated teaching, team teaching,
- PLA technique, project- based learning, cooperative learning,
- Application of ICT in the Science Classroom

Practicum (any one of the following):

- Assignment on writing objective in behavioral terms in the content area of science at upper primary level and secondary level
- Report on the contribution of an Eminent Scientist Assignment on facts, principles, law and theories – their characteristics in the content of science (citing example of each)
- Prepare two micro teaching lessons on the content areas of science.

Course Objectives:

The objectives of this course are-

1. Develop insight on the meaning and nature of biological science for determining aims and strategies of teaching-learning;
2. Appreciate that science is a dynamic and expanding body of knowledge;
3. Appreciate the fact that every child possesses curiosity about his/her natural surroundings;
4. Identify and relate everyday experiences with learning biological science
5. Appreciate various approaches of teaching-learning of biological science
6. Explore the process skill in science and role of laboratory in teaching–learning
7. Use effectively different activities/experiments/demonstrations/ laboratory Experiences for teaching–learning of biological science;
8. Develop process-oriented objectives, based on the content themes/units

Course outcomes: (COs)

Upon successful completion of the course a student will be able to

CO1	Recall the meaning and nature of science for determining aims and strategies of teaching-learning.
CO2	Express that Science is a dynamic and expanding body of knowledge.
CO3	Develop curiosity about his/her natural surroundings.
CO4	Identify everyday experiences with learning Biological Science.
CO5	Make learning meaningful by using various approaches of Biological Science.
CO6	Develop process skill in science and role of laboratory in teaching learning.

3: Highest Correlated, 2: Medium Correlated, 1: Lowest Correlated

Course Outline:

Unit I: Nature and Scope of Biological Science:

- Science as a domain of enquiry, History of biological science;
- Origin of life and evolution, biodiversity, observations and experiments in biological sciences; Interdisciplinary linkages, biological sciences and society.

Unit II: Aims and Objectives of Biological Science:

- Developing scientific attitude and scientific temper; Acquire the skills to understand the methods and process that lead to exploration;

- Know the facts and principles of biology and its applications consistent with the stages of cognitive development of learners.

Unit III: Exploring Learners:

- Motivating learner to bring his/her previous knowledge in science/biology gained through classroom/environment/parents and peer group;
- Generating discussion, involving learners in teaching-learning process, encouraging learners to raise questions, appreciating dialogue amongst peer groups, encouraging learners to collect materials from local resources and to develop/fabricate suitable activities in biological science (individual or group work)

Unit IV: School Science Curriculum (Biological Science):

- Trends in Science curriculum; Consideration in developing learner-centered curriculum in biology;
- Analysis of textbooks and biology syllabi of NCERT and States/UTs at upper primary, secondary and higher secondary stages;
- Analysis of other print and non-print materials in the area of biological science used in various states.

Unit V: Approaches and Strategies of Learning Biological Science:

- Pedagogical shift from science as fixed body of knowledge to process of constructing knowledge,
- Scientific method - observation, enquiry, hypothesis, experimentation, data collection, generalization; Communication in biological sciences; Problem solving, investigatory approach, concept mapping, collaborative learning, Project based learning, experiential learning in biological science. Simulation, micro-teaching skills and lesson planning.

Assignments: (Any one of the following.)

1. Preparation of model and charts.
2. Herbarium
3. Visit to places of Biological Interest & their reporting by the student
4. Gardening
5. Improvisation, maintenance and repair of Biological Equipment.
6. Review of Biology Science Curriculum

- ii. Develop an insight into aims and objectives of teaching school mathematics
- iii. Understand school mathematics curriculum

Understand approaches and strategies in teaching and learning of mathematics.

Course outcomes (COs):

Upon successful completion of the course a student will be able to

CO1	Mathematics provides an effective way of building mental discipline Explain and express the foundations of mathematics.
CO2	Recall the meaning, nature and different scope of mathematics in life.
CO3	Develop an insight into aims and objectives of teaching school mathematics
CO4	Appreciate approaches and strategies in teaching and learning of mathematics.

3: Highest Correlated, 2: Medium Correlated, 1: Lowest Correlated

Course Outline:

Unit I: Nature and scope of Mathematics:

Meaning and building blocks of mathematics, the nature of mathematical propositions, and its variants-converse, inverse and contra positive; proof and types of proof; Deductive history of mathematics with special emphasis on teaching of mathematics, contribution of Indian mathematicians. Scope of mathematics.

Unit II: Aims and Objectives of Teaching School Mathematics:

Need for establishing general objectives for teaching mathematics. Study of the aims and general objectives of teaching mathematics vis-a-vis the objectives of school education, writing specific objectives in various content areas in mathematics like Algebra, Geometry etc.

Unit III: School Mathematics Curriculum:

Objectives of curriculum, principles of designing curriculum, designing curriculum of different stages of schooling, main goal of mathematics education, core areas of concern in school mathematics, curricular choices at different stages of school mathematics education, construction of syllabi in various disciplines of mathematics, for example, Algebra, Geometry etc; Pedagogical analysis of various topics in mathematics at various levels of schooling –

Unit IV: Approaches and Strategies in Teaching and Learning of Mathematical Concepts

Nature of concepts, concept formation and concept assimilation. Planning and implementation of strategies in teaching a concept. Problem posing and solving, discovering or exploring various options for solving the problems, formulation of generalizations through several illustrations, difference between teaching of mathematics and teaching of science, use of PLA technique, cooperative learning,

Simulation, micro-teaching skills and lesson planning.

Unit V: Meaning and importance/purpose of a lesson plan:

various approaches of lesson planning characteristics of a good lesson plan. Preparation of a lesson plan on various topic of secondary mathematics.

Unit VI: Need and type of teaching aids.

How to use material aid, characteristics of good teaching aids, importance & development of mathematics laboratory, recreational mathematics. Unit-VII: Test-book in mathematic- importance and qualities of a good text-book in mathematics; need and organization, importance of mathematics library.

Unit VIII: Mathematics teacher-functions and qualities of mathematics teacher.

Practicum/Assignment:

Any one of the following -

- i. Preparation of a report on learning difficulties in mathematics of students at different levels
- ii. Preparation of low-cost teaching aid. iii. Assignment on contribution of Indian mathematicians.

2. Understand the nature and characteristics of language and use of English language.
3. Evaluate basic language skills such as listening, speaking, reading and writing and integrate them for communicative purpose.
4. Understand important methodologies and techniques of teaching English.
5. Develop insight into the form and use of English and to give practice in lesson planning.

Course outcomes (COs):

Upon successful completion of the course a student will be able to

CO1	Develop a good understanding of the basic concepts in second language teaching.
CO2	Teach basic language skills as listening, speaking, reading and writing and integrate them for communicative purpose.
CO3	Critically review and use appropriately different approaches to and methods of teaching English as second language.
CO4	Prepare lesson plans on different and prescribed aspects of English as second language.
CO5	Choose, prepare and use appropriate audio-visual teaching aids for effective teaching of English.
